

Please do not implement any law to override Indiana's Telephone Privacy law.

Prior to signing up for privacy, we had no fewer than five solicitation calls per day. These calls would start before I left for work in the morning and continue into the evening. If we were not home, they would be hang ups.

Now, we may get one or two solicitation calls per month!

If we are interested in a product or service, we are quite capable of calling, visiting, or ordering on line. There is no good reason for them to call us at all hours.
